WHIG STATE CONVENTION. We observe that some of the Whig papers do not fully understand the manner of solecting delegates to the State Convention for July 3d. Let us explain.

It was the desire of the Central Committee to have a large Convention at that time, and to have it composed of the ablest and call most discreet men of our party, all over the State. To simplify the business, it was a-greed that these delegates should be chosen in the several townships on the 17th June, and that they should be delegates, on to the county Convention but to the State Convention, at Columbus. For instance, the county of Perry has 12 rownships. Each township is entitled to a delegate to the State Convention, and for every additional hundred Whig votes such township is entitled to an additional delegate. By this, operapon Perry county will probably be childed to about 15 or 16 delegates to Columbus.—
When assembled in Convention these 15 or 16 delegates will be entitled to three votes, by 225 back. that being the proportion of Perry county, as assessed by the Committee. On all questions that arise, these delegates being together will consult and gree among themsolves, and cast their three votes according-This latter plan has heretofore been

the practice of the delegation in attendance, whether more or less than the number of June next, for a township road, leading from votes the bounty is entitled to, in all cases casting the number of votes assigned thereto. No county Convention is necessary. Les the County Central Committée get the names of the delegates from the several townships, and send them to us without fail
Such is the plan. We hope our Whig paPost Office at Pomerov, May, 15, 1851. pers will see to it that the matter is rightly nderstood and carried out.

ANOTHER SCIENTIFIC WONDER! PEPSIN! THE TRUE DIGESTIVE PLUIS Or Gastrie Juice! A GREAT DYSPEPSIA CURBE.

DREPARED from Rennet, or the fourth stomach I of the Ox, after directions by Baron Lixago, the great Physiological Chemist, by J S HOUGH-TON, M D, No 11, North Eighth street, Philadel phia, Pa.
This is a truly wonderful remedy for INDIGES. TION, DYSPEPSIA, JAUNDICE, CONSTIPA-TION, LIVER COMPKAINT, and DEBILITY.

curing after Nature's on method, by Nature's own method, the Gastrie Juise.

Half a tesspoonfull of this Fluid, infused in vater, will digest or dissolve Pive Pounder Roast Brus 14 ABOUT TWO HOURS, cut of the sterach.
Scientific Evidence!

Baron Luxuo, in his celebrated work on Animal Chemisury, says: "An artificial Digestive Fluid, analogous to the Gestric Juice, may be readily prepared from the mucuous membrane of the stomach of the calf, in which various articles of food, as meat and eggs, will be so softened, changed and digested, just in the same manner as they would be in the human stomach." Dr PREERA, in his famous treatise on "Food and" Diet," published by Fowlers & Wells, New York.

page 35, states the same great fact, and describes the method of preparation. There are few higher authorities than 1 r. Pereira. Dr Compe, in his valuable writings on the Physiology of Digestion, observes that "a dimunition of the due quantity of the Gastric Juice is a prominent and all prevailing cause of Dyspepsia;" and he states that "a distinguished professor of medicine in London, who was severely afflicted with this complaint, finding everything else to fail. had recourse to the Gastric Juice, obtained from

the stomach of living animals, which proved com-pletely successful." Di Granan, author of the famous works on 'Vegetable Diet," says: "It is a remarkable fact in physiology that the stomachs in animals, macerated in water, impart to the fluid the property of dissolving various articles of food, and of effecting a kind of artificial digestion of them in no wise different from the natural digestive process." Dr Sinon's great work, the "Chemistry of Man." (Lea & Blanchard, Phila, 1846, pp 321-2) says: "The discovery of PEPSIN forms a new era in the chemical history of Digestion. From recent experiments we know that food is discolved as rapid y in an an artificial digestive fluid, prepared from Pepsin, as it is in the natural Gastric Juice itself."
Professor Dunglison, of the Jefferson College, Philadelphia, in his great work on Human Physiology, devotes more than fifty pages to an examina-tion of this subject. His experiments with Dr. Beaumont on the Gastrie Juice, obtained from the living human stomach and from unimals, are well known. "In all cases," he says, "digestion oc curred as perfectly in the artificial as in the natu-

ral digestions." AS A DYSPEPSIA CURER Dr Haccaren's preparations of PIPSIN has produced the most marvellous effects, ouring cases of Debility, Emacistion, Nervous Peeline, and Dys-peptic Consumption, supposed to be on the very erge of the grave. It is impossible to give the details of cases in the limits of this advertisementbut authenticated certificates have been given of more than TWO HUNDRED REMARKABLE JURES, in Philadelphia, New York, and Boston alone. These were nearly all desperate cases, and the cures were not only rapid and wonderful, but

ASH AGAINST CREDIT,-Having Vadopted the Cash system, I offer to the citisens generally a splendid opportunity of realizing its advantages. Cash should give its possessor an advantage which under the present system of trade he fails to realize; it being an underiable fact that no business can be conducted as cheap for creditas cash, and no fair dealing man will make a distinction prejudicial to either, when two classes of customers are brought-face to face.
